What sets your software apart from your competition?	Discover Cypress Web features that can make your life easier: Online clinical documentation; Rehab Outcomes Measurement (ROM) with national data comparison; Electronic billing with enforced regulatory compliance; Appointment scheduling; Real-time reporting; Cypress Mobile—record data with your cell phone.	What makes Chart Links different is its people and their depth of knowledge of medical rehabilitation. The company was founded by Ron Miller, a medical doctor from Yale.	TPS: the first software program designed to follow the flow of the office. Documentor: a revolutionary, truly customizable, note and narrative package. Document Solution: a document storage and management system, including x-rays.	Ease of use, speed, mobility, and customization. TheraOffice is designed for therapists by therapists for maximum efficiency in a fast-paced rehabilitative environment.

High-end software, low monthly cost, no start-up fees, no long-term commitment; Includes all training, support, and upgrades.	Planetrehab is comprehensive practice-management software that combines scheduling, billing, customizable documentation, patient management, reporting, insurance-management, and multi-clinic management, specifically for physical therapy.	PTOS is the most widely used vendor for physical therapy with the largest support, engineering, and training capabilities. Discounts apply if you are a Sammons Preston customer.	Extensive practice-management reports, complete configurability of the program including reports, workflows, clinical documentation, and the low cost of connecting multiple sites all distinguish Raintree's TherapyRehab Plus.	The clinical content and workflows are very mature (used by 10,000+ therapists), and our consulting services go beyond implementation to help our clients optimize their financial, clinical, patient-satisfaction, and compliance outcomes.

What sets your software apart from your competition?	Source Medical's EPM/EMR solutions were designed by therapy industry professionals for therapy industry professionals, and are technically designed and proven to support clients from one clinic to more than 1,200 clinics, and 30,000 patient visits per day.	SpectraSoft has worked with more than 2,000 rehab facilities since 1993. Numerous proprietary functions ensure that every visit is documented, every treatment is billed in full, and every claim matches the documentation.	With more than 13 years of experience, TherAssist provides a user-friendly software package featuring customizable scheduling, documentation, and seamlessly integrated billing programs designed to maximize efficiency for both administrative and clinical staff.	Online therapy-specific documentation and scheduling developed by PTs for PTs. No servers to buy, no installs or downloads necessary, no backups needed. Safe, simple, and secure.
